NPIC/TSSG-014-70

3 June 1970

MEMORANDUM FOR: Director of Computer Services, DD/S&T

SUBJECT : Use of OCS Facilities for NPIC Digital Image Manipulation

25X1
1. This is to confirm conclusions reached during the meeting between you, myself, and [redacted] of TSSG/NPIC on 26 May 1970. It is understood that OCS will provide computer support to NPIC in operational Testing of Digital Image Manipulation program as follows:

- a. For a period of approximately six months, 16 hours per week of IBM 360/67 time. This will be utilized during two night shifts and one day of the weekend at OCS convenience.
- b. A minimal level of programming support to assist in converting subroutines from 360/44 language to 360/67 and incorporating some program changes which are found to be desirable during operational testing.

2. As per our discussion, it is difficult at this time to state when this period will start. Our principal problem is that we require a certain type video display console to facilitate the operator in initiating and continuing various image manipulation routines. Technical representatives of NPIC will meet with your personnel to discuss availability and compatibility of off-the-shelf hardware to satisfy this need and make recommendations for procurement or rental of such equipment. We are making every attempt to expedite this effort.

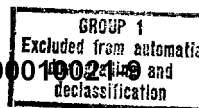

3. We sincerely appreciate your cooperation and technical support in this high-priority NPIC program and look for significant breakthroughs which will be available to all elements of the Agency as soon as they are determined to be operational. We look forward to briefing you and your people on our total efforts in the field of image manipulation in the very near future.

[redacted]
Chief, Technical Services & Support Group,
NPIC
